Emily Curtin

Staff AI/ML Platform Engineer | Cloud Architect for the Model Development Lifecycle
Atlanta, Georgia, United States

Summary

Oil painter, armchair meteorologist, tech conference speaker, junior Model A mechanic

Experience

Intuit Mailchimp

6 years

Staff ML Engineer

August 2022 - Present (2 years 6 months)

Atlanta, Georgia, United States

I lead a squad of 8 engineers to develop the multi-cloud Model Development Lifecycle (MDLC) spanning GCP and AWS. I partner with directors, managers, and fellow Staff Engineers across the AI/ML Platforms team to serve our Data Science and AI customers across the company. I love the folks I work with, the opportunity to communicate up and down the org about our tools

* Saving over \$300,000 in annual cloud spend.

* Designing a tool ecosystem connecting data engineering processes to model development pipelines.

* Leading implementation of cloud resource governance in partnership with Data Stewards.

* Designing efficient remote development environments in GCP for Data Scientists and AI Scientists. (also making sure they don't spend too much on GPUs while also enabling them to do their work.)

* Leading a major model migration from legacy model development systems to a Composer, Dataform, and Kubeflow-based ecosystem. Migrating model serving from in-house GKE system to AWS Sagemaker systems.

* Enabling career growth opportunities for junior and senior engineers on my squad. Leading with self-awareness, empathy, and strong opinions lightly held.

Senior MLOps Engineer

October 2020 - August 2022 (1 year 11 months)

Atlanta, Georgia, United States

Specializing on the MLOps side of things by combining the best of DevOps tools and practices with the experimentally oriented, computing resource heavy world of Machine Learning. If I can take the pain out of your Data Science process, I've done my job.

I love opportunities to teach others through conference talks, blog posts, and junior engineer/intern mentoring. (Gotta put that film school storytelling experience to use somehow!)

Day-to-day I swim around in GCP (BigQuery and Dataflow especially), Docker, Kubernetes (GKE), Python, Terraform, Jenkins (sigh...), SQL, and a whole host of other ML tools. And also git, GHE, and bash but that's just the water we all swim in these days.

Machine Learning Engineer III

February 2019 - October 2020 (1 year 9 months)

Atlanta, GA

- Taking deep learning and statistical models from prototype to production using Python, GCP, Docker, Kubernetes, Airflow, and more.
- Helping the Data Scientists to do more modeling and less engineering.
- Getting those pipelines to scale.

The Weather Company, an IBM Business

Software Engineer

March 2018 - January 2019 (11 months)

Atlanta, GA

Part of a small team leading TWC in the transition from AWS to the IBM Cloud targeting the managed Kubernetes service.

- Developing and documenting workflows and pipelines for deploying and managing application in Kubernetes
- Wrapping existing application for Docker and Kubernetes
- Evangelizing the benefits and capabilities of Kubernetes within the organization

IBM

Software Engineer

February 2017 - March 2018 (1 year 2 months)

Atlanta, GA

I am part of a small team on the Watson Data Platform working with the IBM Spark Technology Center on improvements to core components in Apache Spark and applications in the Spark ecosystem.

My primary project has been working on SparkTC/spark-bench. Spark-Bench is an open source project for benchmarking Apache Spark originated by a group from IBM research. I have rewritten the project and restructured it from a series of independent, Maven-built Spark applications chained together by a series of bash scripts, to a centralized Scala application with a single config file. Users can chain together independent workloads with configurable parameters and structure their runs using three levels of parallelism. This allows users to do traditional benchmarking and complex simulations of different cluster use cases. I am giving a presentation on spark-bench at the upcoming Spark Summit EU 2017.

The Weather Company, an IBM Business Software Engineer

August 2015 - February 2017 (1 year 7 months)

Atlanta, GA

As part of the Analytics Platform team, I build tools to process absurdly large amounts of data in a distributed context.

Tech stack includes Spark, Scala, Streams, AWS, and much more.

Such Tall Tales LLC

Film Editor

April 2013 - April 2016 (3 years 1 month)

Atlanta, GA

Editor for "Travel Light," a feature-length documentary about the Camino de Santiago directed by Lindsay Thompson. Currently in pre-production, shooting slated for summer 2013, expected release in 2014.

CareerBuilder.com

Software Engineering Intern

May 2014 - August 2014 (4 months)

Norcross, GA

- Creating Sinatra based Ruby applications for internal use by the Platform Software team.
- Designed information architecture and custom stylesheet for new developer portal.
- Worked as part of a small Agile team with git-based version control and 100% test coverage policies.

North Avenue Presbyterian Church

Videographer/Editor

September 2012 - September 2013 (1 year 1 month)

Atlanta, GA

Start to finish creation of video content for worship services and web distribution in close collaboration with communications director, pastors, and other church staff.

Projects include:

- Stewardship Campaign 2012
- Advent Season 2012
- Chinese Ministry Testimony Project
- Youth Sunday 2013

Self-Employed

Freelance Editor, Assistant Editor, Sound Editor

December 2011 - September 2012 (10 months)

Atlanta, GA

- Editor and Assistant Editor for various individuals and companies in the Greater Atlanta Area
- Specializing in assistant editing for documentary projects

Florentine Films

Post Production Intern

September 2011 - December 2011 (4 months)

Walpole, NH

- Assisted post production staff with sound effects collection, quality checking, and other tasks
- Involved in creation and maintenance of Excel spreadsheets and Filemaker Pro databases
- Extensive historical photo and stock footage research on many different topics

Films:

- The Dust Bowl (released 2012)
- The Roosevelts (releasing 2014)

Record On Location

Videographer, Photographer, Editor

August 2011 - September 2011 (2 months)

Tyler, TX

- Documented the rock band Eisley recording their new EP through HD video and photographs
- Produced promotional video for ROL and spec music video for Eisley and Equal Vision Records
- Photos published in online feature of Alternative Press Magazine September, 2011

REVO Church

Videographer/Editor

October 2010 - May 2011 (8 months)

- Creating short documentaries, promotional pieces, and motion graphics presentations for worship services and web distribution
- Coordinating with members of creative team, worship team, and pastoral leadership to create effective and unified looks and branding for series and events

Bay Area Tone/PureVolume.com

Festival Video Post Production Coordinator

March 2010 - March 2011 (1 year 1 month)

- Edited individual songs from longer pre-mixed sets or individual camera feeds. Synced with final tracks from audio team
- Responsible for managing all footage over course of multi-day festival
- Responsible for on-site conversion of finished videos to web-friendly format and subsequent upload to video server

Elaine Mayes

Assistant Editor

January 2011 - February 2011 (2 months)

- Responsible for all footage and file organization, maintaining project backups, organizing drives and project files
- Operated FCP under Ms. Mayes, responsible for troubleshooting program errors and creating a smooth workflow

Bay Area Tone

FCP Editor

June 2010 - August 2010 (3 months)

- Edited multi-camera music performances and interviews for web distribution
- Responsible for importing and syncing footage, general media management
- Assisted Video Production Manager with color grading, title graphics, and animation

Duncan Maysilles

Photo Researcher, Restoration

June 2007 - August 2007 (3 months)

- Chose original photos from archival sources to accompany published book
- Handled digital transfer and Photoshop restoration with attention to historical photo restoration guidelines

Education

Georgia Institute of Technology

Bachelor's Degree, Computer Science · (2013 - 2015)

University of North Carolina School of the Arts

BFA, Filmmaking - Concentration: Editing & Sound Design · (2007 - 2011)
